## Introducing Golden's First 3-Zone Power Lift Recliner!

The new **PR545** power lift recliner expands Golden's long-standing, popular Comforter model with MaxiComfort® Positioning and now Twilight Technology.

This luxurious chair offers three Comfort Zones. Zones 1 and 2 work together for individualized positioning of the upper and lower body, along with Comfort Zone 5 to elevate your wellness comfort experience with our patented Twilight Technology.

The **PR545** comes in three sizes to suit everyone's needs – medium, large, and tall.

# PR545 Comforter with MaxiComfort & Twilight Technology Featuring ZG+!

## Introducing Our Exclusive ZG+ Position!

### What is the ZG+ position?

The “+” stands for the combination of our patented Twilight Tilt Technology and our patented MaxiComfort® positioning technology, which re-positions the seat as you recline to gently cradle your body into a unique zero gravity position, elevating your experience in a way other recliners can’t.

Simply press and hold the **ZG+** button to move the chair to this ideal ergonomic position taking stress off the joints and muscles allowing your body to enter a state of complete relaxation.

The weightless experience is one-of-a-kind!

## Why ZG+?

- Straight or “locked” knees can cause stress to your lower back and spine increasing pain in that area.
- Straight or “locked” knees can restrict the venous return of blood back to the heart.
- Many people find the fetal position to be the most comfortable, but too tight of a position can cause stiffness and soreness to muscles and joints.

Adding the supported bend in the knee, in addition to the tilting motion, may help prevent these issues while adding to your overall comfort and wellness, leaving your body feeling rejuvenated like never before.

**Available NOW** on the new PR545 Comforter  
Power Lift Recliner with MaxiComfort & Twilight Technology!
