

Introducing Bruno's Full Visibility Back-Up Camera

ASL-275 and ASL-700 compatible

The camera system is functional whenever the vehicle is running and can be used as an electric rearview mirror as well!

- Waterproof and operates in -4°F - 167°F (-20°C - 75°C)
- Offered as option with new lift or as retrofit
- Meets FMVSS111 rear visibility requirements

Because the camera system uses a wireless connection, **installation is quick**. The camera, attached to the license plate bracket or assembly, is powered by the lift's circuit board while the monitor is powered by an accessory port.

Camera Mount Location:
License plate bracket

Multiple Monitor Locations:
Horizontal
Windshield
Dashboard
Cupholder (not included)
