Hercules Prime US

Special Needs & Adaptive booster seat
that grows with your child for years

Thomashilfen

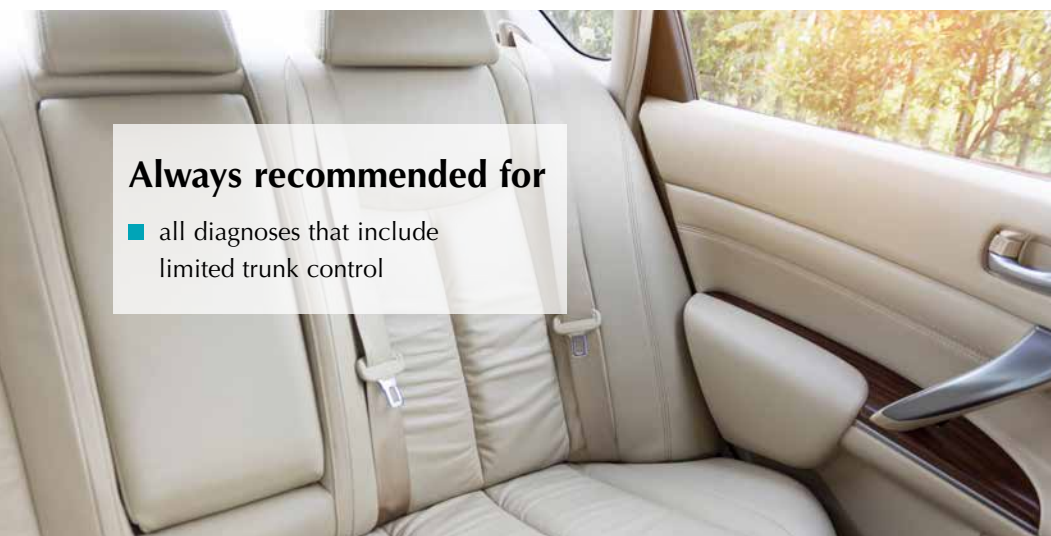

THOMASHILFEN

Hercules Prime US

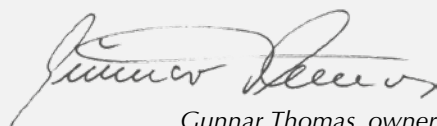

” A strong solution is needed for children, young people and adults with physical and neurological disabilities – so that they are always safe in the car.

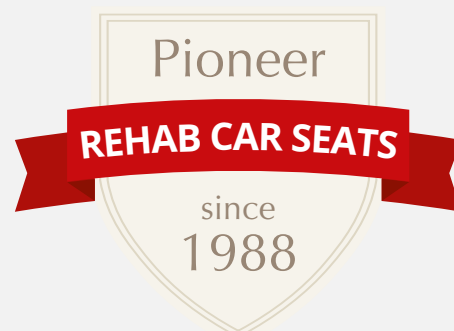

Hercules Prime US has its great performance when adapted car seats have become too small or more support is needed when sitting in the car. As a positioning booster seat that grows with the user, it offers the familiar functions of an adapted car seat and can be very individually equipped with a large selection of accessories that grow with the user. When more support for the head and upper body is needed, a simple belt system in the car is not enough.

For a proper, safe sitting position on every journey. “

Thomashilfen has been providing children with special needs with rehab car seats for over 30 years. Today we also use our know-how to develop our own rehab car seats for children and adults. They incorporate all our many years of experience around the needs of users and their relatives.

Gunnar Thomas, owner

With completely new FUNCTIONS

for body height
130 – 180 cm
51.1 – 70.9"

BACKREST HEIGHT

With the infinitely variable height adjustment of the backrest by 13 cm / 5.1", it is possible to adapt to the user's growth at any time. The head is supported in an optimal position.

The large selection of accessories that grow with the user allows for a long service life.

Fig. incl. accessories

SHOULDER WIDTH

Slim and broad users with a shoulder width of 42 to 51 cm / 16.5 to 20.1" sit well supported at all times.

The shoulder guides (accessory) grow with the user and are infinitely variable and individually adjustable for each side - even asynchronously.

BELT GUIDE

for the 3-point safety belt of the vehicle can be used either on the right or left, the positioning seat can be fastened quickly and easily.

UPHOLSTERY

Thick upholstery for comfortable sitting without annoying sweating, the breathable cover can be completely removed and washed at 40° C.

LATERAL TRUNK SUPPORTS

support the upper body as an individually adjustable accessory. Further accessories that grow with the user are available to support and position the upper body.

BELT BUCKLE

Shoulder straps can be separately clicked into the quick-release fastener, which means easier buckling for the carers.

5-POINT HARNESS

Soft shoulder pads provide additional support and a good seating position during the ride – the correct strap length is quickly adjusted on the two buckles.

CROTCH PAD

reduces the pressure of the belt buckle on the sensitive abdominal area and conceals the belt buckle.

SEAT CUSHION

offers a wide seat surface (38 cm / 15") for large users and makes it easier to get in and out of the seat. Transfer for parents and care givers is also made easier and is easy on the back.

SEAT DEPTH

infinitely adjustable by 6 cm / 2.4", individual adaptation to the growth of the user.

• **HEADREST CUSHION**
for more seating comfort and a comfortable, soft support of the head.

SHOULDER WIDTH
can be individually adjusted with the shoulder guides (accessory) – also asynchronously if required.

BACK HEIGHT
can be adjusted infinitely, so the seat adapts to the user and allows a long supply time.

• **BACK ANGLE**
can be adjusted to the backrest with two quick steps – no tools required, just use the red quick release lever.

• **SWIVEL AND TILTING FUNCTION**
Tilting function up to 10° provides more seating comfort for users with weak upper body control. Swivel function facilitates transfer for users and caregivers. Seat rotates to the right side only.

STANDARD – Functional bases always included

SWIVEL FUNCTION
facilitates the transfer, the positioning seat can be turned to the right side only.

In order to be able to cope with the transfer of the increasingly heavy users with special needs, the swivel function is a real relief for the back of the care givers. The pull-catch is deliberately mounted at the rear to prevent unintentional release while driving.

TILTING FUNCTION
allows seat tilting in several steps (0-10°) for a relaxed resting position while driving

In cases of weak upper body and head control (hypotonic, "floppy"), the adjustable seat tilt is an important support to prevent "tipping forward". The appropriate angle can be adjusted as required.

ACCESSORIES – individual, comfortable & grow with user

► Stability for the rehab car seat

LATCH / SEATFIX Connector
keeps the seat securely in place

STABILIZING BOW
ensures that the seat is held in place when no LATCH / SEATFIX is available

STAND guarantees stable hold of the seat in the passenger footwell

Especially when using the swivel and tilting function, the special needs booster seat is exposed to additional strain in daily use.

Helpful accessories should be used to stabilize Hercules Prime booster seat in the car – for better handling and more safety for users and carers.

► Secure support for head & feet

HEAD REST
for proper positioning of the head and more lateral support if needed

SECOND BELT GUIDE (top) as a convenient option for using the 3-point safety belt either on the right or left side

FOOTREST (foldable)
improves posture and supports ability to push through feet

A complete overview of accessories can be found on the order form on our website:

► Good seating position

LATERAL TRUNK SUPPORTS (firm) provide firm lateral support for the thorax

LATERAL TRUNK SUPPORTS (swing-away) provide firm lateral support for the thorax and facilitate the transfer

UPPER BODY GUIDE (firm) provide firm lateral support over a large area and support the upper body

UPPER BODY GUIDE (swing-away) provide firm lateral support over a large area of the upper body and facilitate the transfer

SHOULDER GUIDE for width adjustable support of the shoulder area

ABDUCTION BLOCK improves leg guidance and prevents the legs from crossing over

LEG GUIDES (left and right) support a stable sitting position and also provide the necessary support for the thighs

THE INCONTINENCE SEAT COVER is placed on the seat cushion. It protects the cover from moisture, so the cover stays clean for longer

► User & vehicle safely protected

FRONT COVER protects the legs and prevents chafing on the seat depth plate

CHEST CLIP prevents twisting of the straps and ensures that the straps stay in place

CUSHION FOR FUNCTION BASE ensures maximum contact surface between vehicle seat and Hercules Prime for more stability

FMVSS 213 STANDARDS
 Hercules Prime US
AND all accessories exceed US FMVSS 213 standards

LARGE BECOMES SMALL & HANDY

Hercules Prime adaptive booster seat can be quickly folded to a small, handy size in a few simple steps.

This not only facilitates installation in the vehicle. – The special needs booster seat can also be easily transported in small cars and can be stowed away to save space.

ONLY 52 x 21 x 73 cm / 20.5 x 8.3 x 28.7"

IN EVERYDAY USE

Adjust the Hercules Prime when placed in the vehicle.

In maximum back height there should be a distance of at least 5 cm / 2" between the top of head and the roof of the vehicle to ensure that tall users can still sit comfortably.
