

User & Vehicle Friendly

Ease of use and versatility makes the Bruno Curb-Sider® a time-tested favorite. Connect the docking device to a scooter or powerchair, push a button, and the Curb-Sider lifts, rotates and stores the mobility device. The Curb-Sider works with a wide variety of vehicles and mobility device weights.

Automated. Power lift/lower and rotate for effortless operation.

Optimized. Vehicle-specific bases provide precise installation. Telescoping head Curb-Sider model (VSL-6900) provides additional extension to clear bumpers and load wide mobility devices into smaller openings.

Slim. Preserve maximum seating and storage. Partial third-row seating or cargo space is available when a mobility device is not present. Optional quick-release pins enable the lift head to fold down for even greater space.

Adaptable. Reinstall in another applicable vehicle or adjust to accommodate a new mobility device.

Lifting Capacity

250 lb (114 kg)

400 lb (181 kg)

450 lb (203 kg)
