# CS600™ Adjustable Electric Bed

2 models: Static Width (CS600-36); Expandable width (CS600-EXP)

## Feature & Benefits

### Cardiac Chair Positioning

Repositioning the bed to a cardiac upright position helps to improve circulation and general healing

### Height Adjustable

Adjustable height range as low as 7" from the ground helps reduce the risk of injury from falls, and up to 30" high for a comfortable working height

### 600 lb. Bariatric Weight Cap (standard)

### Integrated Width Expansion (CS600-EXP only)

### 3 Bed-End Finish Options (sold separately)

Accommodates a wider variety of resident profiles and facility needs

### Wide Frame Base

Provides additional stability in expanded widths

### Tool-Free Assembly

Reduces setup time and complex installation

### Slat Deck Design and Wipe-Down Electronics

Easy cleaning and disinfection

### One-Touch Floor Lock Mobility at Any Height

Aids in ease and efficiency for staff

### Backlit Hand Pendant

10 function backlit hand control for improved visibility and ease of use

### **Market for this product:**

Post-Acute Care: Long-term Care facilities/Skilled Nursing, Rehabilitation Centers, Specialized Clinics, Assisted Living Facilities, Nursing Homes

### **Call Points:**

Skilled Nursing: Administrator, Director of Nursing (DON), Facility Maintenance Manager, Risk Manager, Clinical Staff, Consulting Healthcare professionals, Director of Operations, Purchasing Manager.

### **Testing and Certifications:**

Tested to IEC 60601-2-52 (Medical Bed Equipment Standard for safety, quality and performance).

### **Competitive Information:**

Invacare is a global company who's mission is to design, manufacture and deliver the best value in medical products that promote recovery and active lifestyles for people requiring post acute care.

The Invacare CS600 is positioned as a safe, reliable, and versatile economy solution that meets the dynamic demands in skilled nursing today while remaining price competitive.

### **Value Proposition: Safe. Versatile. Efficient.**

The Invacare CS600 Long-term Care bed is available in expandable and static widths to suit a variety of facility needs and budgets, and features a 600lb. user weight capacity, an easy to clean slat-deck design, and extra low height, which are essential for long-term care facilities in the US.

#### **Safe**

The CS600 meets the highest international safety standard for entrapment and electronics (IEC-60601-2-252), ensuring peace of mind as well as resident and caregiver safety. Wide height range aids in fall prevention and caregiver strain.

#### **Versatile.**

Integrated width expansion system and a 600lb. safe working load accommodates a variety of resident and facility needs.

#### **Efficient.**

Tool free assembly, easy to clean sleep surface, one-touch floor lock and collapsible 2-piece frame make setup, usage, and storage a breeze.

### **Accessory Option (sold separately):**

Bed ends (3 finishes); Quarter length Rails; Assist rail; Trapeze, Attendant Control Panel (ACP); Underbed light; Battery backup; Trolley; length and width extension.
