

by Method Mobility®

Taking you where you want to be

Discover the
easiest way to
add power
assist to your
manual
wheelchair!

Introducing AMP - the innovative device that brings power assist to your manual wheelchair - all without attaching permanent hardware, motors or wheels!

- **Rolls into place:** Simply roll into the AMP and it automatically clicks into position on your chair - no modifications required.
- **Starts with just a push:** Just give your wheelchair's handrims an easy push to get the AMP moving.
- **Navigates naturally:** Use your existing manual handrims to start, stop and change directions - just as you do now but with less effort.
- **Responds to your commands:** Easily power up or change mode settings with the AMP's intuitive Bluetooth remote.
- **Protects your shoulders, wrists & hands:** The AMP gives you a little extra help when you need it.
- **Undock when you're done:** When you don't need the AMP, simply roll off it and use your wheelchair like always with no extra weight to push around.

Get AMP'd!

"The AMP is my superpower - it's the power assist I've been waiting for! I feel like I'm living life again and not missing out on the little things like enjoying outings and walking the dogs!" - Tom Mullen
