# Invacare® Top End® Eliminator™ V Cage OSR Racing Wheelchair

Custom frames may have stylistic variations. Dimensional properties and tolerances committed to by Top End are defined in the Measurement Definitions Documents, which can be found on the resource center of [www.topendwheelchair.com](http://www.topendwheelchair.com)

DEFINITIONS:	
<b>Assembled vs Unassembled:</b>	If TE10046 (Unassembled) is selected the chair will require about 60 minutes of assembly upon delivery (instructions provided). If TE10047 (Assembled) is selected the chair will be fully assembled upon delivery. Shipping rate is \$150 for all shipments in the continental US. Freight quotes for shipments outside the continental US are available upon request.
<b>Open V Cage:</b>	Recommended for beginner level athletes with T-10 SCI and above as that level of injury requires more of a bucket type seat. Designed for people who prefer the seated position and/or may also want to kneel. This cage does require good transfer skills.
<b>U Cage:</b>	Recommended for experienced customers who exclusively use the kneeling position. Customers tend to have good balance and are T-10 injury level or below. U cage includes an aluminum knee plate for extra rigidity.
<b>I Cage:</b>	I Cage is the easiest transfer style to use but cannot be converted to a kneeling position. This style is typically used by higher level injury athletes who sit in the traditional feet forward position with an adjustable fixed style footrest.
<b>Aluminum Solid Seat:</b>	Provides a solid surface. Not recommended if customers intend to adjust the seat upholstery.
<b>Carbon Fiber Solid Seat:</b>	Provides a solid Carbon fiber surface. Not recommended if customers intend to adjust the seat upholstery.
<b>Cut Out Camber Tube:</b>	The distance from the front of the cut Camber Tube to the back of the support tube. Recommended when a customer who desires a kneeling position requires additional space for their lower legs. This additional space is accomplished by removing the center portion of the camber tube after welding. Creates more room for legs with low seat heights.
<b>Camber Angle:</b>	Angle of the wheels. Measured from vertical to the angle of the rear tire on one side.
<b>Upper Frame Width:</b>	Measured directly above the center of the Camber Tube, between the insides of the Fenders. Maximum width is 17".
<b>Lower Frame Width:</b>	Measured at the top of the Seat Rail and from the outside of the Uprights. Maximum width is 18".
<b>Rear Seat Height:</b>	Measured from the top of the Seat Rail to the ground.
<b>Overall Length:</b>	Measured from the further most outsides of the front & rear tires.
<b>Axle Position:</b>	Measured from the center of the Camber Tube to the front of the rear Upright. <b>(This needs to be parallel to the ground.)</b>
<b>Knee Height:</b>	Measured from the top of the U-Cage Horizontal Cross Member to the ground.
<b>Knee Depth:</b>	Measured from the back of the Rear Upright to the front of the U-Cage Cross member. <b>(This needs to be parallel to the ground.)</b>
<b>Knee Width:</b>	Measured between the inside of the U-Cage vertical tubing.
<b>Wheel Size:</b>	Eliminator OSR Racing wheelchairs use 700c and 26" size wheels with threaded axles. A standard threaded axle 700c metal spoke wheel with inflated black primo tire measures 26-1/2" +/- 1/8" from outside to outside of the tire. A standard threaded axle 26" metal spoke wheel with inflated Panaracer tire measures 24-1/2" +/- 1/8" from outside to outside of the tire.
<b>Pushrim Size:</b>	Measurement from outside to outside of the metal tubing of the pushrim.

PRODUCT SPECIFICATIONS:	
<b>Weight Capacity:</b>	250 pounds, 113 Kilograms
<b>Approximate Chair Weight:</b>	21 pounds, 9.5 Kilograms
<b>Approximate Box Weight:</b>	37 pounds, 17 Kilograms
<b>Box Dimensions:</b>	77" X 27" X 23"

NOTES:	
<b>Tubular Tires:</b>	A tubular tire (or sew-up) is a bicycle tire that is stitched closed around the inner tube to form a torus. The combination is then glued onto the wheel.
<b>Clincher Tires:</b>	A clincher tire uses a separate airtight inner tube enclosed by the rim which supports the tire carcass and maintains the bead lock. An advantage of this system is that the inner tube can be easily accessed in the case of a leak to be patched or replaced.
<b>Front Tire:</b>	Vittoria tire has a thicker tread pattern and is great for training and racing.
<b>Rear Tire Options:</b>	- 700c Continental Sprinter tires are great for racing and training - 700c Continental Podium are thinner lighter, better for racing
<b>Fenders:</b>	Fenders are made to accommodate a tire that is up to 25mm.
<b>Omit Wheels:</b>	When omit wheels is selected, product will not come with wheels, tires, tubes, pushrims or axles.

## Warranty Info:

Invacare warrants the frames and forks when purchased new and unused to be free from defects in materials and workmanship for a period of two (2) years from the date of purchase from Invacare or a dealer, with a copy of the seller's invoice required for coverage under this warranty. Invacare warrants the upholstered materials (seat and back) and remaining components of this product when purchased new and unused to be free from defects in materials and workmanship for a period of thirteen (13) months from date of purchase from Invacare or a dealer, with a copy of the seller's invoice required for coverage under this warranty
