# Pace Saver®

Transportability plus durability, reliability, and value.

#### **OUR HISTORY**

In 1967, Bill and Zella Burke risked all they had to invent and manufacture healthcare products. Mr. Burke said "[I will] dedicate myself to inventing home care products for the infirm". The resulting family of products allows people to maintain their independence so they can stay in their home close to friends and relatives.

The company that Mr. and Mrs. Burke started employed thirty people; twenty were seniors or disabled and they received national awards for hiring veterans. In our 3rd generation, we continue Mr. Burke's dedication to building reliable long lasting products and supporting America.

Bill Burke, PaceSaver

#### WHAT AMERICAN MADE MEANS TO YOU

Today while many scooters and power chairs are made in low production cost countries like China, PaceSaver continues the 30 year tradition of building to a higher standard of durability and reliability. We are the **only** manufacturer of scooters and power chairs to build all our models in the U.S.A. Because our products are built in the U.S.A., the FDA inspects our plant for design controls, good manufacturing practices and quality systems on a regular basis while foreign plants are not. Industry tests of foreign products reveal poor quality components and designs that do not work as claimed or worse are dangerous if used per the instructions in the owners manual. American made gives you a higher level of Quality Assurance.

#### AMERICAN MADE MEANS U.S. STOCKED PARTS

U. S. stocked parts keeps your scooter running for years. We stock millions of dollars worth of parts in Kansas City, whether for new product or decades old. Our parts are "over here" not "over seas"! So over 90% of our replacement parts are shipped within one working day.

#### AMERICAN MADE KEEPS AMERICANS WORKING

Leisure-Lift keeps all of America working! We buy over 5,000 parts manufactured by 580 vendors located in 44 different states. The efforts of people from all over the United States go into our mobility products.

#### All PaceSaver products are built in America.

#### Extra Degree of Protection

- Incline stability is determined per US Ansi/Resna Dynamic Stability Test 8.2.
- A confident ride indoors & out.

### Mirror Glaze<sup>™</sup> Lasting Beauty

- Rich "depth of color" reflective finish.
- Color "through and through" ABS substrate.
- Won't chip, peel or fade.
- "Scratch guard" easy maintenance.
- Deep clear coat hardened acrylic layered.
- Simply wipe with damp rag or wax.
- No paint, No ugly touch ups.

The direct descendant of the Famous PaceSaver our most popular scooter Plus III is designed for ease of car transport. The individual battery boxes eliminate a bulky plastic shroud, enabling the *Plus III* models to be separated and stored in the most compact space. All *Plus III's* feature the Soft-touch tiller for **shoulder comfort** and **easy access**, luxurious "Com-For-Back" high backed seat for all day comfort and support, "Mirror-Glaze<sup>TM</sup>" color for **rich long lasting beauty**. *Plus III* performance features the **industry's best incline stability** rating, the **most powerful**, **easiest to drive**, **safer state-of-the art controller** standard, quiet powerful 3 brake transaxle drive system, **shock absorbing** resilient **suspension** and easy access **on or off board worldwide charger**. Enjoy a comfortable, confident ride on America's most popular scooter -- *PaceSaver Plus III*.

#### Plus III Premier

Stylish indoor and outdoor capability with comfort only a full size scooter can give. *Plus III* combines excellent indoor maneuverability and leg room with outdoor power and stability, 300 lb. capacity with a 20 - 30 mile range, at a brisk, 5.25 mph speed and the industry's best warranty.

#### Plus III Titan

The brawny *Titan* is designed for long hill climbs and demanding terrain. *Titan* adds a mighty 4 pole 4" motor for 25% more power, 5.40 mph. speed and 350 lb. capacity. Titan is an excellent value in a maximum performance scooter.

#### Plus III Atlas

The 450 lb. capacity *Atlas* adds to the Titan a special reinforced frame with side anti-tips for additional stability, 21" seat (optional to 24"), height, width and angle adjustable arm rests and an on board charger. *Atlas* retains the excellent style,maneuverability, stability, transportability and comfort of the Plus III.

# **Digital Electronics**

- Powerful 110 amp. controller for more power.
- *Push-Too-Fast*<sup>™</sup> eliminates disengage runaways.
- Power Boost™ technology for inclines on hills.
- Battery Saver™ for extended range.
- Audio-visual indicators provide constant status.

American made controller is enclosed & isolated. VA & CE moisture tested.

- Look under the hood!
- Encased digital controller.
- Isolated from road moisture.
- Double layered moisture protected throttle.

# Smooth, Reassuring Control

- Advance Controller Programs for smooth transition through all speed ranges.
- Meets FDA required radio wave runaway protection of 20 volts per meter.

# Real Transportability

- Quick & easy single pull-pin separation.
- Separates into 3 easy pieces.
- Fits in most cars, vans and SUV's.
- Or use our Magnum Power Lift.

Easily Transportable

Specifications subject to change. Incline stability is determined per US Ansi/Resna Dynamic Stability test 8.2. Stability increases by leaning forward or seat not in highest position.

#### **Five-Year Limited Warranty**

Five-year prorated limited transaxle warranty. Three-year prorated limited warranty on Main Frame components. One-year prorated limited warranty covering virtually all internal components, including the electronics.

#### Lifetime Extended Warranty

Lifetime warranty on frame components. Two-year prorated limited parts warranty. Please consult the Owners Manual for eligibility requirements and details of the warranties. Batteries are not part of either warranty.

Battery Charger - Battery chargers are standard equipment with PaceSavers and are a heavy duty, Micro-Light 24 volt constant current fully automatic charger specially manufactured for Leisure-Lift.

Batteries - PaceSavers are designed to utilize size U-1 sealed deep cycle type batteries. These batteries, supplied by your dealer, may be purchased from Leisure-Lift or supplied by a local source. Leisure-Lift only provides warranty coverage on its own batteries. Because they are 24 volts, PaceSavers require two (2) batteries. Please note: all batteries require some form of maintenance. Deep cycle batteries must be kept charged! Batteries left for some time without using and/or charging will go bad.
