

## PROTEKT SEAT AND BACK ONE PIECE CUSHION

The Protekt seat and back one piece cushion combines the therapeutic seating of a foam wheelchair cushion with a lumbar supporting back cushion for an all-in-one dynamic seating and positioning cushion. The cushion seating surface high density foam has individual cuts throughout to provide the ultimate pressure redistribution while offering the patient enough support to provide a comfortable seating environment. The contoured back portion will help with lumbar support as well as encourage proper seating positioning which will assist in correct patient spine alignment.

With our one piece cushion construction, patients who may spend a long period of time in their wheelchairs will benefit from the ease of use with our Seat and Back cushion. The fluid resistant stretch Nylon cover helps redistribute pressure and provide a more comfortable seating position for the patient. The Protekt Seat and Back One Piece Cushion is also designed with safety in mind with a non-skid bottom and backing material as well as fully adjustable Velcro straps to keep the cushion fully secure. Comes in standard sizes up to 26" wide (custom sizes available) and has an 18 month non-prorated warranty the Protekt Seat and Back cushion is the all in one seating solution for your patients.
