

New Product:

striveEZ

A Smoother Way Forward

Available in four sizes, the new Strive EZ Stroller builds on the trusted performance of the original Strive with thoughtfully engineered upgrades designed for smoother handling, improved durability, and enhanced user comfort.

It features a one-piece articulating push handle for more intuitive control, an angle-adjustable footplate to better accommodate positioning needs, and soft rubber tires for a quieter, smoother ride across various surfaces. A reinforced cross brace adds strength and stability, making the Strive EZ a reliable and refined mobility solution for growing users and everyday use.

Availability & Compatibility

The Original Strive with “cane style” push handles is still available.

All Strive accessories are fully compatible with new Strive EZ.
