WHITMYER[®] HEADS UP[™]

≡ The premium solution for anterior head positioning

WHITMYER® HEADS UP™

≡ **The Whitmyer Heads Up** is an innovative head support designed to maximize clients' interaction with their environment by providing anterior, posterior and lateral support of the head and neck. It features swing-out, adjustable arms to easily accommodate client transfers and varying client presentations.

Innovative Anterior Stabilization Arms

- Provide anterior and lateral stabilization of the shoulders and trunk for optimal head control
- Swing-out function allows for easy transfers while maintaining proper head support
- Lower lateral adjustments accommodate varying body shapes

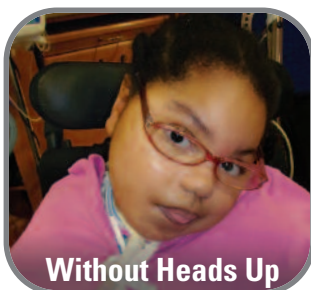

Available with Two Industry-Proven Posterior Support Options

- Contoured Cradle
- Sub-Occipital (shown to right)

Compatible with Full Whitmyer Hardware Offering

- Removable
- Swing-Away
- Fixed

Without Heads Up

With Heads Up
