

UltraCare® XT  
leading bed evolution

## Redefine Your Care Environment

We already make the best bed in the business. Naturally, we wanted to improve it and increased functionality was our guide. Introducing the evolutionary UltraCare XT from industry leader, Joerns Healthcare. It is safer, more comfortable, faster and easier to use, with advanced features that no other bed offers.

But what truly sets the UltraCare XT apart is its unprecedented versatility. A design that transforms both the healthcare industry and your facility's ability to provide superlative care in exceeding the unique and varied needs of your residents.

The UltraCare XT's multi-faceted features enable you to use this bed across a broad array of service options. From standard to deluxe resident rooms, or short stay and bariatric applications, the UltraCare XT delivers flexible care solutions. It is the next-generation bed that is extraordinary in every way excellence is measured.

We have added to the great features you've trusted in the UltraCare bed.

- **Residential Style** – Attractive wood kit transforms bed's appearance to that of a residential bed.
- **UltraWide** – New wider bed extension kit offers additional comfort and safer resident repositioning.
- **Enhanced Controls** – Ergonomic for residents and caregivers with raised buttons, angled staff control, and optional backlighting.
- **UltraLock** – Provides quick, easy bed movement and security at any height.
- **AdvanceCare** – Gravity-assist repositioning and comfort chair positioning promote flexible, safer, more comfortable care.

**UltraCare<sup>®</sup> XT**  
One Bed. A Total Solution.

### It's a perfect bed for **DELUXE ACCOMMODATIONS**

The UltraCare XT has been created to look as great as it functions with features that offer residents the comforts of home. Consider the attractive wood-detail option that gives the appearance of a residential bed with a wide array of finishes. Stylish panels are also available. The UltraCare XT's UltraWide extension kit expands beyond a twin width and provides safer repositioning. For even more resident comfort, the PrevaMatt Elite surface is soft, yet highly resilient, gently cradling the resident's head and torso. Strategically-located mattress cuts promote easier flexing when the bed frame is contoured and keeps the resident in place to reduce the need for repositioning.

### It's a superior bed for **SKILLED NURSING FACILITIES**

When gerontologist consultants guide design, the result is the best geriatric bed in the industry. Enhanced controls include features such as an intuitive pendant that is ergonomically functional and optional lighted buttons that enhance usability day or night. Add an assist handle with two positions for convenient use and perfect grip height to support resident transfer in and out of bed. We even partnered with Tempur-Pedic to offer mattresses that deliver enhanced pressure redistribution and comfort. When put all together, the end result is a versatile bed that meets your care challenges with safety in mind.

### You Wanted Functional Speed and We Responded

**QuickCare** is standard, providing fast hi-lo adjustment.

Our QuickCare hi-lo speed raises and lowers the bed in less than 35 seconds. This increases bed operation efficiency under typical load applications and faster adjustments enable caretakers to deliver more enhanced resident care.

It's a flexible bed for  
**BARIATRIC NEEDS**

Flexibility is another design element where no other bed compares. The UltraCare XT can extend to a wider surface area, efficiently adding up to 7" to the sleep surface so you can more effectively manage your bariatric population. Also, with a safe working load of 500 lbs and a possible mattress width of 39" or 42", your Joerns bed offers more room for comfort and safer repositioning. AdvanceCare provides gravity-assist repositioning and comfort chair positioning, offering flexible care solutions while making repositioning safer and more comfortable for your residents and for your care providers.

It's an ideal bed for  
**REHABILITATION NEEDS**

The UltraCare XT is in a class of its own. The UltraLock option is designed for mobility and security at any height, promoting easier bed movement and safety. The four-section sleep surface has a full-range of comfort with therapeutic positions that improve circulation. QuickCare hi-lo speed promotes more efficient care while repositioning is made safer and more comfortable when using the 39" or 42" UltraWide extension kit. The trapeze can be added for rehabilitation needs and adjusts to accommodate most residents' reach, with three working positions for greater flexibility. Adding the Residential Style trim kit immediately lends a more homelike feel to the care environment.

**Unique Features to Help Reduce Resident Falls**

77% of resident falls occur within the first 48 hours of admission. The **SafeLight** accessory provides soft floor lighting for residents to egress the bed during overnight hours.

The ergonomically mounted **Deluxe Assist Handles** provide a secure hand hold to support residents in maximizing their safety and comfort during bed transfers.

**is the only bed you'll ever need.  
Standard. Once again.**
